Aryan Yadav

AI/ML & Generative AI Developer

ay6033756@gmail.com | +91 8318695055 | LinkedIn | Github | Leetcode | Portfolio | Greater Noida, India

Education

IEC College of Engineering & Technology, Greater Noida, India **Sep 2023 – Present**

B.Tech – Computer Science Engineering

– Expected Graduation: May 2027

Technical Skills

Languages: Python, SQL
ML/DL: Scikit-learn, PyTorch, TensorFlow, ANN, CNN, RNN, LSTM/GRU
Generative AI & LLM: RAG, LangChain, LangGraph, Langsmith, Hugging Face, Transformers, LLM APIs, Fine-Tuning
Agentic AI: Multi-Agent Systems, MCP, Tool Calling, Agent Workflows, Structured Outputs, CrewAI, Prompt Engineering
Databases & Retrieval: Qdrant, FAISS, ChromaDB, Graph Databases, Supabase
NLP : TF-IDF, NLTK, Tokenization, Text Classification
Data: Pandas, NumPy, Matplotlib, Feature Engineering, Data Preprocessing
Backend & Deployment Tools: FastAPI, Docker, AWS (Lambda, API Gateway, S3), Vercel, Render, Git, GitHub
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

Experience

EWB EduTech Private Limited — AWS Cloud Intern
Virtual — Sep 2026 – Oct 2026

- Completed a 4-week AWS internship focused on cloud computing concepts and the AWS ecosystem.
- Received internship completion certification following the successful completion of the programme.

Projects

ResearchPilot AI — Multi-Agent Research Intelligence Platform
Python, LangGraph, LangChain, FastAPI, Supabase, Tavily, Gemini, Groq, OpenRouter | *GitHub Link* | *Live Demo*

- Built a multi-agent research system using LangGraph for planning, web search, evidence extraction, claim verification, and report generation.
- Implemented LLM fallback with Gemini → Groq → OpenRouter and structured outputs for reliable agent communication.
- Evaluated the pipeline on 19 sources, 16 evidence items, and 18 claims, completing 159 LLM calls in an end-to-end benchmark.
- Recorded 149.3s end-to-end latency with 24 SSE progress updates during report generation.

DocuMind AI– AI Document Intelligence Platform
Next.js, FastAPI, Qdrant, Supabase, Gemini, Groq | *GitHub Link* | *Live Demo*

- Built a multimodal RAG platform for PDF, DOCX, and image documents with semantic search and citation-grounded Q&A.
- Designed an end-to-end pipeline using OCR → embeddings → Qdrant retrieval → LLM generation, with Gemini/Groq fallback and SSE streaming.
- Achieved 205 ms median TTFT and 1.78 s median end-to-end latency across 35 RAG queries.
- Achieved 92.9% RAG faithfulness and 85.7% citation accuracy across 35 evaluation queries.

Insurance Premium Prediction API
Python, FastAPI, Pydantic, scikit-learn, Docker | *GitHub Link*

- Built a FastAPI microservice that classifies insurance premium categories (Low/Medium/High) from user demographic and lifestyle data, returning a confidence score and full class-probability breakdown.
- Engineered derived features– BMI, lifestyle risk, age group, and city tier– directly in the Pydantic request schema using computed fields and validators, keeping the model input pipeline clean and stateless.

Achievements

- Solved 200+ DSA problems on LeetCode
- GDG Solution Challenge - Google Developer Groups On Campus, 2025
- Microsoft AI Skills Fest 2026 - Completed AI-focused learning program.

Certifications

- Claude with the Anthropic API - Anthropic
- Introduction to Model Context Protocol (MCP) - Anthropic
- PyTorch for Deep Learning Bootcamp - Udemy
- Machine Learning A-Z: AI, Python & R - Udemy
- Claude Code in Action - Anthropic
